Regarding public access in the vicinity of the Long Wharf, the Commission recognizes the important on-water and shoreline recreation goals for the area, and the need to maintain the security of the Wharf. We strongly encourage the CSLC and Chevron to continue to work with the Bay Trail Project Staff and community members interested in providing a pathway adjacent the shoreline near the Long Wharf. The Commission believes that both goals — secure facility operations and linking the Bay Trail access along the Bay's shoreline — can be treated as compatible, achievable objectives at the Long Wharf.
